
JOB OFFER Site Deputy Manager in an Offshore Aquaculture M/F

GLORIA MARIS GROUP is one of the European leaders in marine aquaculture. Our international group (220 people), established in Corsica over 30 years ago, is experiencing growth and is looking to strengthen the operational team of its historic subsidiary based in Ajaccio. We combine passion, expertise, high standards, and a commitment to quality across all our productions. The premium quality and strong identity of our farms determine our positioning in the market both in France and internationally. This subsidiary, "**Acquadea**", and its "**Ferme Marine des Sanguinaires**", which breeds sea bass, royal sea bream, and meagre, has climbed all the ranks of recognition, both in terms of the exceptional quality of its breeding and its particularly demanding sustainable development production methods. It is now one of the main exporters of the island.

By our side, you will share our values and our acute awareness of the major food and environmental challenges facing the planet. You want to participate in this great transformation of our production and consumption methods represented by quality aquaculture as a sustainable solution for future generations. You have the opportunity to join our team of passionate collaborators because we are currently looking for:

[Site Deputy Manager M/F – CORSICA Site \(FERME MARINE DES SANGUINAIRES\)](#)

Missions :

Under the authority of the site manager, your missions are as follows:

- Assist the Site Manager in the operational maintenance of the site by ensuring responsibility for the livestock and supervising daily activities.
- Participate in monitoring and ensuring the proper use and regular maintenance of material investments.
- Collaborate with the five teams (fishing, feeding, handling/diving, maintenance, and logistics) to ensure effective and harmonious management.
- Participate in budget compliance and production objectives.
- Contribute to ensuring the safety of the teams by implementing and applying protocols and preventive measures.
- Ensure strict compliance with procedures, breeding protocols, and task plans established by the company.
- Identify and propose improvements both in terms of living conditions and production techniques, with a focus on innovation and efficiency.

Profile :

Having already gained experience in offshore aquaculture, you enjoy fieldwork and are recognized for your management skills. Your ability to work effectively in a dynamic and demanding environment, while demonstrating resilience and flexibility, is essential. In short, successful experience in team supervision and operations management in a marine and living environment will be decisive.

Professional diving and boat driving diploma required.

Heavy goods vehicle license is a plus.

Type of contract: Permanent

Available as soon as possible

Location: Ajaccio, Corsica, France

Send your application to: flora.duval@gloriamaris.com
