## Gårdsfisk is looking for an **aquaculture technician**

*Gårdsfisk was founded by the entrepreneurs Johan Ljungquist (marine biologist) and Mikael Olenmark Dessalles (civil engineer). The water-loving salesman and the technically brilliant "designer" teamed up - and developed a concept of fish farming on land.*

*Gårdsfisk wants to create sustainable food production and raise the world's most sustainable fish. The positive effects are several - to ensure that we can continue to eat fish but with reduced environmental impact, to keep the countryside alive by building fish stables on existing farms, fish manure is used as fertilizer on the land around the farms and to carefully manage our natural resources by ensure that the water is recycled without eutrophication.*

We are currently looking for an **aquaculture technician** to join our adventure. The main part of the job will consist of taking care of our animals inside the hatchery and pre growing unit (0,2-20 grams). You will work in a team under the responsibility of the site manager.

### **Task description :**

- Sanitary maintenance of livestock systems
- Monitoring water quality of the production system
- Grading / Counting / Feeding
- Scheduled maintenance on recirculation systems
- Making sure the animals are in a low-stress environment and in a healthy state
- Making sure the facility meets hygiene standards
- Executing research protocols closely with the manager
- Participating in weekend routine

### **Appreciated skills:**

- Strict in following procedures
- Technical skills to execute maintenance and repair
- Curiosity, autonomy, proactive
- Hatchery experience

### **Skill requirements:**

- English - good knowledge in writing and orally
- B Driving licence
- C Driving licence (will be appreciate)
- Graduate in Two-year technical degree or Bachelor Degree in aquaculture (No answer for higher diplomas)
- Available during weekends every 4th week (according to the schedule)

### **Details:**

- Hiring date: As soon as possible
- Location: The location of the work is Skåttilljunga, Skåne (Sweden)
- Full time (40 hours per week)
- Salary: Minimum 24 000 SEK per month according to experience
- Contract: 6 months trial before indefinite term
- No lodging in the farm
